

# Alla Lighting 7440 7443 LED Strobe Brake Lights Bulbs Super Bright W21W T20 Wedge High Power 2835 SMD 12V Flashing Strobe Stop Lights Replacement for Cars, Trucks, Brilliant Pure Red Review-2021

**FLASH**

[Read Customer Reviews](#)

(Set of 2) 7443 Strobe led brake light bulbs will strobe at the beginning braking mode for much easier notified and safer stop & then turn stable solid brake light (Legal blinking times) to avoid any automotive cars, trucks, SUVs, RVs rear-end collision.

LED Chips: 39 pieces high quality, high power with high performance 2835 led chips per 7440/7443 strobe brake led bulb ---360 degree full angle illumination with projector lens design

T20 7443 dual filament, big difference between high and low intensity light output, replacing rear 7440 7443 brake stop light, center high mount stop ( 3rd brake ) light,etc. Extra load resistors maybe required to avoid the error code or blinking issue.

The length is about 2.09 inch. Cross reference number: 7440, 7441, 7443, 7443LL, W21/5W, 7443/26201, 78660, 78661, 17919, 7515, HIB7443WM, W21W, 7440/26200, 17632, 7504, W3x16Q, 7440LL, etc.

One Year Warranty Compatible with both standard type and CK/SRCK type. Voltage: 12V - 24V, built in stable current IC driver for longer lifespan.This listing features one pair (2 pieces) super bright strobe flash 7443 7440 LED bulbs with high power 39 pieces 2835-SMD LEDs, each 7443 led bulb is about 1000 lumens, especially designed for replacing stock dim halogen or incandescent brake stop tail light, center high mounted stop light lamp.

This bulb will strobe flash at the beginning of braking model and then keep solid light, which blinking for braking stop safety alert, much easier noticed while braking and much safer when stop required.The blinking times are restricted and can drive on the road safely.

Your Car Deserves to Upgraded to Newest Advanced LED Strobe Flashing Brake Lights Bulbs Specifications

Adopted advanced LED strobe applications to make the bulb strobe legally and make your driving safer, smarter and brighter Amazing strobe effect will make the drivers behind you well-noticed to avoid the chances of collision The big difference of the light brightness between the driving and braking mode makes the driving much easier Lumens: 1000 Lumens per 7440/7443 LED bulb Working Voltage: 9V - 24V This bulb will strobe flash at the beginning of braking model and then keep solid light, which is legal blinking for braking stop safety alert, much easier noticed while braking and much safer for braking. Working Power: 5.1W/bulb for high intensity light output; 0.75W for low intensity light output, big difference between high and low intensity light output, easily noticed while braking at brake mode or blinkering at the turn signal mode. Working Current: 425MA for high intensity light; 63MA for low intensity light. Color: Brilliant pure red ( optional 6000K White, also we have non-strobe version) Dimensions: 2.10(L) \* 0.70(D)\*0.35(H) Inch LED Type: High power and high illumination 2835 SMD

Comparison Between Alla Lighting Strobe LED Brake Lights Bulbs VS Stock Lamp

Left is Alla Lighting 7443 LED Red Bulbs VS Right is Stock Halogen Bulb

Color Difference: Alla Lighting 2835-SMD 7440/7443 led bulbs shows super bright pure red , yet the stock lamp shows dim yellowish red color Brightness Difference: Alla Lighting 2835-SMD 7440/7443 led bulbs has much bigger difference between the high intensity and low intensity light output, about 1000 lumens for high intensity, and 200 lumens for the low intensity, yet for the stock lamp is about 350 lumens for the high intensity light output. Power Consumption Difference: Alla Lighting 2835-SMD LED 7443 bulb draws about 5.1W for high intensity yet the stock lamp draws about 28W, led bulbs draw much less current than stock lamps Performance Difference: Alla Lighting 2835-SMD LED 7443 turn signal light makes your car more easily noticed while switching line by switching to the turn signal light, and also makes your car look much more luxury than stock lamp, more attractive. Light Angles Difference: Alla Lighting 2835-SMD 7443 LED bulbs is 360° full angle degrees light output, the same light theory as the stock lamp for the best light performance.

Features

More than triple brighter than stock dim halogen/incandescent 7443/7440 lamp Compatible with both CK and standard socket, no need worry about the socket burn out issue any more. Drawing much less current than stock lamps, low power consumption for longer lifespan Each LED bulb is equipped with 39 pieces high power, premium quality and high illumination 2835 SMD led chips Built in Intelligent IC driver for better stable current performance and heat dissipation for longer lifespan Fit any T20 wedge base, Cross reference number: 7440, 7441, 7442, 7443, W21W, WY21W, 7443LL,

**FLASH**

7440NA, etc NOT CANBUS error free type, For some vehicles, extra load resistors maybe required to avoid the error code or blinkering issue.
