

Arduino Uno Nano 3 Axis Stepper Control, Variable Sequencer PLC, A4988 Compatible, Pulse Direction Stepper Control. Easy to Use and Friendly Software. Review-2021

[Read Customer Reviews](#)

Runs on almost any PC which has : WIN 10, 8, 7, XP, Millenium, NT 2K, 98.

Since the CNC Controller is running on a dedicated Arduino Uno/Nano, it does not load the CPU of your Desktop or Laptop.

An interactive interface that visually shows you what to do with easy to understand instructions.

An easy 3 steps process that is simple and effective : 1-Plug USB Cable 2-Connect to Arduino Uno/Nano 3-Start Machining

Variable sequence control. Review 2021, feedback 2021, promo code, discount code 2021, buy, picture, description, sale, price comparison, cheap, cheapest, value for money.
