

D'Addario Accessories PW-CT-9V DC Power Adapter â€” Minimize Need to Change Batteries on Pedalboard and Other Devices Requiring 9V â€” 500mA Max Current â€” Tip-Negative, Sleeve-Positive Power Supply Review-2021

[Read Customer Reviews](#)

BATTERY-FREE PERFORMANCE – You won't need to worry about dead batteries in your pedalboard ruining your performance when you use an AC-DC 9-Volt Power Adapter. You can ensure a consistent, battery-free performance when you directly power it.

VERSATILE - The adapter converts AC wall power to 9-Volt DC for powering most instrument pedals and other 9-volt battery devices. The D'Addario adapter can also be used to power tip-negative keyboards.

500mA MAX CURRENT - The tip-negative, sleeve-positive power supply can deliver 500mA to fuel even your most power-hungry devices.

PRODUCT INFO - Input: 100-240VAC; Output: 9VDC, 500mA; Barrel size: 2.1mm; Polarity: Tip –; Cord Length: 72"; Available in NEMA, F plug and G plug types.

D'ADDARIO ACCESSORIES - For over 20 years, D'Addario Accessories (formerly Planet Waves) has been leading the industry in innovative and problem-solving products that serve musicians worldwide. D'Addario Accessories are proudly made in a state-of-the-art manufacturing facility to the most stringent quality controls in the industry.

AC-DC 9-VOLT ADAPTOR

Ensure consistent, battery-free performance with the D'Addario AC-DC 9-Volt Adaptor. The adaptor converts AC wall power to 9-volt DC for powering most instrument pedals and other 9-volt battery devices. The tip negative, sleeve positive power supply can handle 500mA to power even your most power hungry devices.

Features:

9V DC power supply
Tip negative, sleeve positive
DC 500mA max
Note: The 9 volt adapter can also be used for other manufacturers' electronics
