GRADUAL SUNLESS TANNING - Jergens Natural Glow Wet Skin Moisturizer glides on smooth for in-shower application, and helps deepen your natural skin tone with minimal transfer or drying time

Jergens Natural Glow Wet Skin Moisturizer +firming for Body

Multitaskers everywhere, rejoice. This all-in-one formula was specifically designed to be applied directly to wet skin and gradually build a flawless, natural-looking tan, plus it contains firming ingredients that help to improve skin's texture. Applied to wet skin just after showering, the lotion glides on smoothly and absorbs quickly, locking in hydration with a blend of collagen, elastin, and ginseng to help increase elasticity and reduce the appearance of cellulite in as little as 7 days.

Jergens Natural Glow color-enhancing technology works with your natural skin tone to create streak-free, hassle-free, natural-looking color, and the colorless formula won't transfer to your towel or clothes. Just pat dry and go! In as little as 7 days, you can look more tanned, toned, and summer-ready all year round.

How To Use

Step 1: Prep Your Skin

Apply to clean, wet skin. For optimal color results, exfoliate with Jergens Natural Glow Color Primer Exfoliating In-Shower Body Scrub once a week prior to color application.

Step 2: Apply

Shake off excess water and smooth product onto skin as you would your regular body lotion, rubbing thoroughly in circular motions. Start with a dime-size amount of lotion for each arm, and a quarter-size for each leg. Use sparingly around dry areas like knuckles, knees, ankles, elbows, and in between fingers and toes. Pat dry with your towel to lock in your glow. Color stays on you, not your towel. Wash hands after use.

Step 3: What to Expect

You don't have to wait to get dressed - just pat dry and go! With daily application, you'll notice a visible color change, and a flawless, natural-looking glow in about one week.

Step 4: Maintaining Your Glow

Once you've reached your optimal color, use every other day to maintain your glow. If you discontinue regular use of the product, normal bathing and your skin's natural exfoliation process will fade the color in about one week. If you have any unwanted color on your skin, use a body scrub to remove it.
