

MG217 Medicated Moisturizing Psoriasis Cream With 3% Salicylic Acid - 3.5 oz Tube Review-2021

[Read Customer Reviews](#)

One 3.5 oz tube of MG217 Medicated Moisturizing Psoriasis Cream With 3% Salicylic Acid
Fragrance free MG217 psoriasis cream for itchy skin provides relief from redness, itching and scaling in a soothing seborrheic dermatitis treatment

Moisturizing skin cream is a salicylic acid treatment that has Provitamin B5, avocado oil, shea butter, bisabolol, aloe, vitamin E, allantoin and panthenol

Medicated skin cream controls flaking and helps prevent psoriasis and seborrheic dermatitis symptom recurrence in a soothing moisturizing cream for dry skin

Fast-absorbing seborrheic dermatitis cream doesn't stain and can be used as a daily salicylic acid cream
What is Psoriasis?

Psoriasis is a chronic, auto-immune disease that appears on the skin. Psoriasis occurs when skin cells quickly rise from their origin below the surface of the skin and pile up on the surface before they have a chance to mature. This happens because the immune system sends out faulty signals that speed up the growth cycle of the skin cells. Normally this turnover takes about a month, but in psoriasis it may occur in only a few days.

According to the National Psoriasis Foundation (NPF), medication applied topically to the skin or scalp is the first line of defense when treating psoriasis.

Only two actives approved by FDA for psoriasis treatment are available over-the-counter: Salicylic Acid and Coal Tar

How do they work?

As a psoriasis treatment, salicylic acid acts as a scale lifter, helping to soften and remove psoriasis scales, and allowing other topical medication to better penetrate affected skin.

Coal tar is known to help slow the over-growth of skin cells occurring in psoriasis, and helps reduce the inflammation, itching and scaling of psoriasis.

Doctors recommend combining salicylic acid use with other treatments, including coal tar, to enhance psoriasis treatment effectiveness.

Salicylic Acid (also called Sal-Acid) helps remove buildup and prepares skin for optimal response to other treatments.

Coal tar helps reduce itching, scaling and irritation. It works best when applied to a clean and smooth skin surface, allowing for maximum skin penetration.

For optimal results consider a combination of solutions

More Choices. More Control.

There's not one right product for everyone. That's why we've created the broadest line of therapeutic skin treatments for all-over psoriasis relief.

MG217 Shampoo & Conditioner
