WHY RoC RETINOL?

RoC was the first to discover a method for stabilizing retinol, combining it with ingredients like Vitamin E to make it safe & effective for daily use. We have been perfecting this formula for over 25 years & are one of the leading experts in retinol skincare.

NOT ALL RETINOIDS ARE CREATED EQUAL

RoC is committed to making anti-aging solutions accessible to everyone. RoC uses retinol, the most potent retinoid available without a prescription, in all of our Retinol Correxion formulations (Clinical data on file).

POTENCY-PRESERVING PACKAGING

RoC retinol formulas are packaged in opaque tubes, glass bottles, & jars that limit exposure to light & air. This helps preserve the integrity of the retinol formula. In 2017, RoC discovered a formula that can be packaged in a jar without compromise, currently used in MAX Daily Hydration Crèmes. RoC continues to innovate formula preserving-packaging and in 2020 launched encapsulated retinol, perfectly dosed and sealed for optimal freshness & potency.
