The 'Unique' never came out in a sudden , it must be the impact of many creative minds. The 'Creative' never means to re-built, it grows from modify. But the 'Attractive' starts only when the modify makes you 'different' !!

Years ago, I was trying to find the trends of good products, i even force myself into logistic, searching thousands kinds of goods everyday. When finally i realized the words above, i created KOOPAO, i formed a team innovative , we made every product different, we upgrade them every year, maybe we are not the best , but we are trying the most , hope you will like the idea of this brand, also our products !!

-- Perry Oyang

Founder of KOOPAO , a brand involved in digital cable & accessories . KOOPAO, Let's create it out !!

Why you have to choose KOOPAO Type C to 3.5mm Aux Stereo Audio Cord rather than others?

1. Premium DAC Built-in chip restore the original audio tone -- HIFI Sound.2. High quality 4/L braided wire itself with Kevlar surface -- For Lossless Signal Transmission3. Bonus Velcro tape -- keep the cable orderly all the time .4. Superb fit, no need to remove phone cases during use (within 5mm) .5. Just plug and play, no drivers required, super convenience.

Apple: Ipad pro 2020/ 2018 , Macbook, Mackbook Air & other brands which with USB type c port like XIAOMI , Motorola , SONY , HTC & etc

FAQ 1 -- volume turning by itself with this cable ? -- No

Answer : No , Whether it is the theory or the extensive testing we have done, we have not discovered this situation . As this cable is only signal output , can not reverse transmit back to cellphone .

We actually found this 'volume turning down by itself' is a frequently happened problem in different cellphones itself , not the cable . the search result shows there are a lot of people with same problem .

It mostly caused by the incompatible software of the cellphone itself. We have compiled some of the most helpful solutions we found on internet for your Ref.

FAQ 2 -- Why the new cable has no respond when connect with the phone ?

Answer : Please don't worry , the cable is still in good condition , you just need to make some settings .

Normally , If it doesn't work for a new cable , there must be a setting in the phone not enabled for the cable .

As different brand's phone is different , please take below setting for Ref. & have a try to set similar in yours .

Settings -> Google -> Account Services -> Search, Assistant, and Voice -> Allow wired headset requests with device locked (On)
